Q: I'm unable to get an ID from an image. How do I retrieve the ID of an image? I have a jquery plugin that listens for events, and as part of that, takes an image ID from the input. I have a function that takes the ID from the img element and sends it to a webservice. However, the input only seems to hold the event related to the image and not the ID. How do I get the ID of an image element using jQuery? A: Use.attr("id"). For example, if you have \$(".attr("id", "test")), then you can get the id attribute with this: var id = \$("#test").attr("id");

You are here Sai Krishna Chaitanya Sai Krishna Chaitanya is a young, self-driven and an ambitious person, who is made for superlative performance.
