Using our service you agree to our.Going to work, or going to school, or going to the gym, or being on the road, or being at home, or being in transit means you have no choice but to carry that bag with you. It's heavier than you think, and it may never be completely empty. That bag stays with you because it's the only thing you really own. The Parachute Bag gives you a better option. A backcountry-inspired backpack, the Parachute Bag is made of durable nylon, features a full-length, seat-belt ready strap, and has a zipper for load capacity. The Parachute Bag fits most standard airline carry on sizes, so you don't have to worry about traveling with anything you're not sure fits or if it's a hassle. The Parachute Bag can be checked, scanned, tagged, and carried through security and x-ray machines. At \$250 and free shipping in the United States, you can't go wrong with Parachute Bag.Julius Jacobson Julius Jacobson (December 5, 1912 - April 19, 2003) was an American inventor and mechanical engineer, often recognized as the first person to develop a "walkie-talkie" radio, the first portable electric ice cream maker and the first automated car wash. Life and career Jacobson was born in New York City on December 5, 1912. He worked as an engineer with the Westinghouse Company. One of his earliest inventions was the Automatic Slot Machine for the Game and Magazine Depository Association, which won a Dreyfus Award for design excellence in 1949. In 1953 Jacobson invented the walkie-talkie, which was similar to a transistor radio and was used for the first time in the
