
Lightcycler 480 Software Free 55 ~UPD~

March 4, 2010 - LightCycler® 480 - Software Version 1.5. The LightCycler® 480 weighs approximately 55 kg. This device is one of the most powerful devices available on the market for converting sunlight photons into electricity. Due to its size and weight, it is able to provide energy to an entire city or village. Based in France, the LightCycler® 480 has begun producing energy equivalent to that from burning 8,200,000 kg of coal, and this energy is equivalent to about half the coal demand in Paris.
